

**EMT
PTI 5-1
Medication Administration Performance Evaluation
For Acetaminophen & Albuterol**

Candidate's Name: _____

Candidate's Name: _____

Percent Required to Pass: 71% (12 of 17) **Objective:** Emergency Care 12th edition Chapter's 18 & 19:
18.3, 18.4, 18.5, 18.6, 18.7 18.8 & 18.11/ 19.3, 19.5, 19.6, 19.8, 19.9, 19.12 & 19.13

Equipment Required: Acetaminophen and Albuterol medications

Read instructions to candidates

Given two separate scenarios for medical emergencies that indicate the use of Acetaminophen & Albuterol. You must successfully demonstrate proficiency in the administration Acetaminophen & Albuterol .

1st Attempt		2nd Attempt		Skill Checklist
P	F	P	F	
_____	_____	_____	_____	<u>Performs Administration of Acetaminophen Candidate #</u>
_____	_____	_____	_____	1. Obtains SAMPLE history
_____	_____	_____	_____	2. Verbalizes indication for use of acetaminophen
_____	_____	_____	_____	3. Verbalizes contraindications
_____	_____	_____	_____	4. Checks for prior patient interventions
_____	_____	_____	_____	5. Performs the 5-R's: Patient ___ Drug ___ Dose ___ Route ___ Expiration ___
_____	_____	_____	_____	6. Correctly demonstrates assisting with the medication administration
_____	_____	_____	_____	7. Demonstrates reassessment of the patient
_____	_____	_____	_____	<u>Performs Administration of albuterol -Candidate #</u>
_____	_____	_____	_____	8. Obtains SAMPLE history
_____	_____	_____	_____	9. Verbalizes indication for use of albuterol
_____	_____	_____	_____	10. Verbalizes contraindications
_____	_____	_____	_____	11. Checks for prior patient interventions
_____	_____	_____	_____	12. Performs the 5-R's: Patient ___ Drug ___ Dose ___ Route ___ Expiration ___
_____	_____	_____	_____	13. Has the patient exhale deeply
_____	_____	_____	_____	14. Delivers one spray/puff of albuterol as patient inhales, has patient hold their breath
_____	_____	_____	_____	15. Instructs the patient to exhale
_____	_____	_____	_____	16. Repeats steps 13. 14. 15
_____	_____	_____	_____	17. Reassesses the patient & verbalizes dosages for administration of Albuterol (2 puffs = 1 dose; 2 doses within 30 min utes)

**Medication Administration Performance Evaluation
For Aspirin & IV Maintenance**

Candidate's Name: _____

Percent Required to Pass: 73% (11 of 15) **Objective:** Emergency Care 12th edition Chapter's 18, 19 & 20: 18.3, 18.4, 18.5, 18.6, 18.7 18.8 & 18.11/ 19.3, 19.5, 19.6, 19.8, 19.9, 19.10, 19.12 & 19.13/ 20.3, 20.4, 20.5, 20.6, & 20.7

Equipment Required: Aspirin, and IV Bag & Administration kit

Read instructions to candidate
Given two separate scenarios for medical emergency that requires the use of aspirin & IV maintenance. You must successfully demonstrate proficiency in the administration of aspirin & performing IV maintenance.

1st Attempt	2nd Attempt	Skill Checklist
--------------------	--------------------	------------------------

P F P F

_____	_____	_____	_____	<u>Performs Administration of the Aspirin</u> 1. Obtains SAMPLE history 2. Verbalizes indications for use of aspirin 3. Verbalizes contraindications 4. Checks for prior patient interventions 5. Performs the 5-Rs: Patient ___ Drug ___ Dose ___ Route ___ Expiration ___ 6. Administers the aspirin by mouth (1 325 mg tablet or 4 81 mg tablets) 7. Advises patient to chew the aspirin 8. Reassesses the patient & verbalizes medical consult for additional dose
_____	_____	_____	_____	
_____	_____	_____	_____	
_____	_____	_____	_____	
_____	_____	_____	_____	
_____	_____	_____	_____	
_____	_____	_____	_____	
_____	_____	_____	_____	
_____	_____	_____	_____	<u>Performs IV Bag set up and maintenance</u> 9. Verbalizes indication for IV maintenance 10. Verbalizes correct solutions 11. Verbalizes contraindications 12. Checks IV bag for expiration date 13. Checks bag for any impurities within the IV solution 14. Correctly demonstrates how to check and monitor flow for IV 15. Verbalizes how to recognize and correct infiltrated, non-flowing, leaking lines

**Medication Administration Performance Evaluation
For Nitroglycerine & AED Operation**

Candidate's Name: _____

Percent Required to Pass: 71% (15 of 21) **Objective:** Emergency Care 12th edition Chapter's 18 & 20:
18.3, 18.4, 18.5, 18.6, 18.7 18.8 & 18.11/20.3, 20.4, 20.5, 20.6, & 20.7

Equipment Required: Nitroglycerine training medication, Adult CPR manikin torso, BVM, AED and Assessment Equipment

Read instructions to candidate
Give a scenario with a patient with cardiac history experiencing chest pain, you must successfully demonstrate proficiency in the administration of nitroglycerine including this drug's side effects, contraindications, precautions and dosage. Given a patient in cardiac arrest you must successfully demonstrate the use of an AED

1st Attempt		2nd Attempt		Skill Checklist
P	F	P	F	
_____	_____	_____	_____	<u>Performs Administration of Nitroglycerine</u>
_____	_____	_____	_____	1. Obtains SAMPLE history from patient, including OPQRST
_____	_____	_____	_____	2. Verbalizes indications for use of NTG
_____	_____	_____	_____	3. Instructs partner to give oxygen, NRM 15 lpm
_____	_____	_____	_____	4. Instructs partner to obtain vital signs
_____	_____	_____	_____	5. Verbalizes contraindications
_____	_____	_____	_____	6. Checks for prior patient interventions
_____	_____	_____	_____	7. Performs the 5-R's: Patient ___ Drug ___ Dose ___ Route ___ Expiration ___
_____	_____	_____	_____	8. Checks for the use of Viagra, Levitra, Cialis, Addcirca or Revatio within past 48 hours
_____	_____	_____	_____	9. Confirms patients vital signs BP>90, HR>60
_____	_____	_____	_____	10. Administers nitroglycerine sublingually
_____	_____	_____	_____	11. Describes potential side effects
_____	_____	_____	_____	12. Reassesses the patient's condition and repeats
_____	_____	_____	_____	13. Reassesses the patient & verbalizes obtaining medical direction for additional doses. (Evaluator: Inform student patient loses consciousness)
_____	_____	_____	_____	<u>Performs CPR / AED</u>
_____	_____	_____	_____	14. Confirms patient is in cardiac arrest
_____	_____	_____	_____	15. Instructs partner to begin CPR
_____	_____	_____	_____	16. Sets up the AED and correctly places pads on the patient
_____	_____	_____	_____	17. Turns on the AED, analyses the heart rhythm
_____	_____	_____	_____	18. Clears everyone from the patient and safely shocks the patient
_____	_____	_____	_____	19. Initiates CPR immediately post shock
_____	_____	_____	_____	20. Continues CPR for two minutes and reassesses heart rhythm with AED
_____	_____	_____	_____	21. Verbalizes partners switching positions & immediately resuming CPR
